

Mykola Maslakai

Front-End Developer(React)

Ukraine, Khmelnytskyi
0992620229 | nikolaymaslakay@gmail.com | [Linkedin](#) | [Github](#)

Summary

I have over a year of experience in frontend development, focusing on complex web services. My project experience encompasses both team-based and individual projects, demonstrating versatility and collaboration skills. I am detail-oriented and possess strong analytical abilities, enabling me to quickly grasp new information and technologies. Beyond coding, I am committed to continuous self-improvement by learning new technologies and expanding my skillset.

Skills

Programming Javascript, Typescript
Frameworks React, React Native, Redux, Next, Node.js, Express, REST API
Databases PostgreSQL, MongoDB, SQL Server

Languages

English : Intermediate

Ukraine : Native

Experience

Team Challenge

Front-end developer

- Development and support of the user interface of the marketplace.
- Interaction with designers and back-end developers to ensure optimal functionality.
- Implement new features and improve existing code.
- Optimize page loading speed and support for responsive design.

Khmelnytsky, Ukraine

Jan. 2024 - Present

Freelancehunt.com

- Work on projects of various sizes and complexity.
- Development in Javascript(TypeScript) and NodeJS.
- Work and negotiations with clients.

Khmelnytsky, Ukraine

Feb. 2023 - Present

Project

Marketplace Peach (volunteer team project)

TS, JS, React, ReduxToolkit, Tailwind CSS, Node.js

Peach is an online platform designed to facilitate the buying and selling of goods among users. It provides a secure environment for sellers and buyers, allowing them to easily interact and conduct transactions.

The goal of Peach is to create a convenient and reliable platform where users can exchange goods, explore new offers, and make purchases with maximum confidence.

Role: Front-End dev.

Marketplace-Sviy (volunteer team project)

TS, JS, React, Next.js, ReduxToolkit, Tailwind CSS

Marketplace-Sviy is an online platform designed to support Ukrainian manufacturers who want to introduce and sell their products through the Internet. In this market, manufacturers can post information about their products, including photographs, descriptions and prices. In addition, the platform provides safe and convenient payment and delivery methods so that buyers can make purchases with confidence and comfort.

Role: Front-End dev.

Netflixtube

TS, React, Next.js, MongoDB

"Netflixtube" is a web application created based on the design of the Netflix service. This application allows for the viewing of a large number of movies. Here are some features: the application implements a verification system that allows users to create their own accounts for storing personal settings and movie lists, verification using Google and Github: Users can use their Google or Github accounts to log into the application, providing an additional level of convenience and security, adding movies to favorites: Users can add movies to their favorites, allowing them to easily return to them later.

Role: Full-Stack dev.
